---

**PROFESSIONAL SUMMARY**

Motivated B.Tech student in Artificial Intelligence and Data Science at Anna University (Expected 2027), seeking a Data Analytics or Data Science internship. Enthusiastic and adaptable, with hands-on project experience in building machine learning models, conducting exploratory data analysis, and designing interactive real-time dashboards. Eager to apply strong problem-solving skills to meet dynamic industry data needs.

---

**TECHNICAL SKILLS**

- **Programming & Libraries:** Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, SciPy.
- **Data Visualization & BI Tools:** Tableau, Power BI, MS-Excel, MS-PowerPoint.
- **Core Competencies:** Data Analysis & Analytics, Data Science, Machine Learning, Deep Learning, Statistical Modeling, Predictive Analytics, Data Cleaning & Preparation, Exploratory Data Analysis (EDA).

---

**ACADEMIC PROJECTS Fraud Transaction Detection using ML Model** | *Python, LightGBM, Scikit learn, Pandas* | *Feb 2026*

- Developed a robust classification model to identify fraudulent transactions using the dataset similar to Paysim.
- Engineered an end-to-end data processing pipeline utilizing **RobustScaler** to mitigate the impact of outliers and **log1p transformation** to normalize skewed feature distributions.
- Applied **SMOTE (Synthetic Minority Over-sampling Technique)** to address significant class imbalance, ensuring the model effectively learns from rare fraudulent patterns.
- Achieved a **92% F1-score (harmonic mean)**, demonstrating a highly optimized balance between precision and recall for critical fraud identification.

**Tableau Dashboard for Real-Time Air Pollution Monitoring** | *Tableau Public, Python, Pandas* | *Feb 2026 – Present*

- Designed and deployed an interactive dashboard utilizing Tableau Public to monitor air pollution metrics.

- Automated real-time data ingestion and refreshment from government datasets by writing custom Python (.py) scripts.
- Utilized Pandas for comprehensive data cleaning and manipulation prior to visualization.

**Behavioral Trading Analysis: Sentiment vs. Performance** | *Data Analysis* | *Feb 2026*

- Analyzed extensive trade logs to identify distinct behavioral archetypes among traders.
- Explored the intersection of trader psychology and execution performance, evaluating metrics such as win rate, volume, and frequency to determine the correlation between emotional states and profitability.

**Heart Disease Prediction and Insights** | *Python, Machine Learning* | *Jan 2026*

- Conducted in-depth exploratory data analysis (EDA) to uncover health trends and risk factors.
- Engineered a predictive model to accurately assess heart disease risk based on patient attributes.

**Power BI Dashboard for Aviation Flight Routes Analytics** | *Power BI* | *Jan 2026*

- Developed a comprehensive Power BI project to visualize and analyze complex aviation flight route data.

**Car Sales Prediction Model** | *Python, Machine Learning* | *Jun 2025 – Jul 2025*

- Executed end-to-end data science tasks, including rigorous data cleaning and the creation of a predictive model forecasting car sales.
- Used random forest regressor for ML model prediction, achieved 88% precision score.

---

**EDUCATION B.Tech, Artificial Intelligence and Data Science** | *Anna University of Technology, Chennai* | *2023 – 2027*

- *Relevant Coursework:* Statistics and Numerical Methods, Data Structures, Object-Oriented Programming, Exploratory Data Analysis, Artificial Intelligence, Machine Learning, Fundamentals of Data Science, Probability and Statistics, Deep Learning, Big Data Analytics, Distributed Computing, Cloud Computing, Ethics and AI, Image and Video Analytics.

**Senior Secondary (XII), Science** | *CBSE Affiliated School* | *2023*

- *Percentage:* 74.00%
